

Laser Therapy

What is Laser Therapy?

Laser Therapy is an affordable, surgery free, drug free, noninvasive treatment to reduce pain & inflammation, and increase speed of healing.

How do Laser Treatments work?

The laser works by using a cold laser light to deeply penetrate tissue without damaging it. The laser energy induces a biological response in the cells which leads to reduced pain, reduced inflammation, and quicker healing.

What medical conditions can benefit from the use of Laser Therapy?

There are many conditions, both acute and chronic, that can benefit from laser therapy.

Acute Conditions

Wounds
Allergies
Infections
Cuts/Bites
Inflammation
Sprains, Strains, & Fractures
Post Surgical Pain

Chronic Conditions

Degenerative Joint/Disc Disease
Inflammatory Bowel Disease
Hip Dysplasia
Arthritis
Otitis/Ear Infections

Other Facts about Laser Therapy:

-Patients do not need to be sedated or restrained,
and your pet will likely not feel the treatment.

-You may see positive results after the first treatment. Often a series of treatments will be necessary to achieve the desired results, but the healing process begins right away.

-Most treatments take 2-4 minutes, while larger areas may require up to 10 minutes for a full treatment.

-This sessions can be scheduled with a technician, which allows for more flexible scheduling.

-Affordable pricing for advanced technology:

Single treatment	\$20
Package of 4 treatments	\$60
Package of 8 treatments	\$110
